GUNA D

Python Developer | Generative AI

gunasiva248@gmail.com | 7094062327 | Chennai | LinkedIn | Github

CAREER OBJECTIVE

Python Developer specializing in **Generative AI and LLM-powered applications**, with hands-on experience building **RAG pipelines, AI-driven data analytics, and backend solutions**. Skilled in **Python, Django, Django REST Framework, OpenAI, LangChain, prompt engineering, embeddings, FAISS, SQL, and REST APIs**. Experienced in integrating LLMs with backend services, databases, and data processing workflows to develop scalable and intelligent enterprise applications.

WORK EXPERIENCE

TATA CONSULTANCY SERVICES (TCS)
Python Developer | Vodafone Client
Chennai | **Feb 2025 – Present**

- Designed and developed **5+ backend application workflows** using Python and Django with clean, modular, and layered architecture.
- Built and maintained **15+ RESTful APIs** using Django REST Framework with input validation, exception handling, and structured logging, reducing production bug reports by **~30%**.
- Developed and optimized **SQL queries, indexes, and database operations**, improving query performance by up to **40%**.
- Used **Django ORM** for transactional data management and reliable multi-step database workflows.
- Integrated backend services using **REST APIs and JSON-based data exchange**.
- Configured **AWS S3, Lambda, and IAM** for file management, automation, and serverless deployment, reducing manual deployment effort by **~60%**.
- Implemented **token-based authentication**, environment-specific configuration, debugging, and application performance optimization.
- Collaborated in **Agile/Scrum** teams using Git, code reviews, testing, and DevOps practices.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, HTML, CSS
Generative AI: Generative AI, Large Language Models (LLMs), OpenAI API, Prompt Engineering, RAG, Embeddings, LangChain
AI/ML: FAISS, Vector Search, AI Analytics, LLM Application Integration, Machine Learning Fundamentals
Backend & APIs: Django, Django REST Framework, REST APIs, JSON, Object-Oriented Programming, Layered Architecture, Authentication, Exception Handling
Databases: PostgreSQL, MySQL, PL/SQL, Django ORM, SQL Queries, Database Design, Indexing, Query Optimization
Cloud & DevOps: AWS S3, AWS Lambda, AWS IAM, Docker, Git, GitHub, Postman
Practices: Agile/Scrum, Unit Testing, Debugging, Code Review, Logging, Performance Optimization

PROJECT DETAILS

AI-POWERED DATA VISUALIZATION TOOL
Technologies: Python, Django, Django REST Framework, React.js, LangChain, RAG, OpenAI, FAISS, PostgreSQL

- Developed an **AI-powered data visualization platform** using Python, Django, React.js, and PostgreSQL for interactive dashboards and intelligent data insights.
- Implemented a **Retrieval-Augmented Generation (RAG) pipeline** using LangChain, OpenAI, embeddings, and FAISS to retrieve relevant dataset context and generate grounded AI responses.
- Integrated **OpenAI LLMs** with backend services to generate intelligent insights, trend analysis, anomaly detection, and automated data summaries.
- Applied **prompt engineering** techniques to improve the relevance and consistency of LLM-generated responses.
- Developed data ingestion workflows supporting **CSV/Excel uploads, processing, filtering, aggregation, and visualization**.
- Built **REST APIs** and implemented token-based authentication for secure frontend-backend communication.

EDUCATION

DHANALAKSHMI SRINIVASAN ENGINEERING COLLEGE
B.E. – Computer Science & Engineering
CGPA: **8.3/10**
Perambalur | **Jul 2020 – May 2024**
